

Administration Report & File.

from 1907-1921

J. M. A.

General Administration Report for 1905-06.

General Department.
No. 1864

Bombay Castle,
20th March 1907.

Letter from the Compiler, General Administration Report for 1905-06, No. 2, dated the 16th January 1907:—

"I have the honour to report the completion of the General Administration Report for the year 1905-06. I regret to have to report that owing to reasons about to be stated it has been found impossible to publish the Report by December 15th, the date on which it was due. The first of these reasons is the lateness of the dates on which certain important materials specified in the attached schedule* were received. After calculating the time required in this office for summarising reports, the time required for printing and for getting proofs approved and finally the time required for the publishing of the General Administration Report in its final form, I have arrived at the conclusion already reached by most of my predecessors in this office, that unless the majority of materials are received by October 15th and the remainder before November 15th, it is impossible to get the work done up to date.

" * * * * *

"4. The inefficiency of the summaries submitted to this office in advance of full reports, especially in the case of those submitted by officers of the Political Department, has on many previous occasions been noted by my predecessors. I regret that I am obliged to reiterate this complaint. There is no need for fresh orders on this subject, but I would request that the attention of all officers submitting summaries in advance of their full reports be drawn to paragraph 4 of the letter from the Compiler, General Administration Report for 1887-88, printed with Government Resolution, General Department, No. 1368, dated 4th April 1889.

" * * * * *

"6. I have the honour to request sanction for the retention of the Head Clerk, Mr. Ganpatrao, up to January 16th, 1907.

"7. I have much pleasure in recording the satisfaction given to me by my Head Clerk, Mr. Ganpatrao Ramrao Kothare, and his Assistant, Mr. Samuel R. Adhav, in the performance of their duties. The work of the Press has throughout been satisfactory."

Government letter to Mr. L. Graham, I.C.S., Compiler, General Administration Report for 1905-06—

Thanking him for the manner in which he has performed his work; and remarking that the delay in the submission of the Report was due to causes beyond his control.

RESOLUTION.—The attention of Heads of Offices should be drawn to paragraph 1 of the letter and they should be requested to furnish the materials required for the General Administration Report with greater punctuality. Their attention should also be invited to paragraph 2 of Government Resolution No. 1368, dated the 4th April 1889, in respect of the preparation of summaries for the General Administration Report.

2. The retention of the services of the Head Clerk up to the 16th January 1907 is sanctioned, the charge being met from the grant for section work for the General Department.

Savannor
April 1910
Adm R

From

The Sub-Superintendent of Police
Savannor.
To, The Diwan of Savannor.

Sir

With reference to your No 877
dated 23rd Nov 1909 forwarding the
extract para 2 from G. O No 6655
dated the 7th Oct 1909 Pol. Dept. On
the Administration Report of the
Savannor State for the year 1908-09,
I respectfully beg to state that the
remarks on the Police, in the above
extract are not accurate as can
be seen from the following Table
of proportions of acquittals & discharges
to convictions for the year 1908-09.
(Kindly vide Appendix V of the Administra-
-tion Report for the year 1908-1909.

Percentage of acquittals & discharges.	1907-08 — 1908-09
	29.03 — 26.6
Percentage of convictions	70.9 — 73.3

Therefore it is evident that the percentage of convictions of the year 1908-09 is high and that of acquittals & discharges is lower than those of its preceding year.

I beg to add that in as much as 11 persons were convicted and 4 persons were discharged or acquitted out of 15 persons arrested in the year 1908-09, it can not be said that there is extremely high proportions of acquittals & discharges to convictions, as was remarked, in the last portion of the extract of the G. R. referred to above. Therefore the remarks seem to have been passed through oversight.

I further beg to state that I have only noted the para 2

para 2 of your memo referred to

above. The vacancy was committed a
year & a quarter ago, at the time of the
deceased Sub Inspector Mr. Shankaram

Since my arrival here property worth
Rs 48/- stolen in the district has
been traced and the accused concerned
a Karkasi of Bangithi Gurhal, has
been convicted & sentenced. I have
been still endeavouring my best in
the matter.

I have the honor to be

Sit,

Yr most obedt servant

Inhospit-

27/6/00.

Ernst

Sub-Inspector of Police

Nov. of 1861. Sister

2003

8786.

The figures for 1908-9 are not compared with those for 1907-8 by Govt., so far as percentages of admissions or discharges & court costs

are concerned. Govt apparently
expect a higher percentage of convictions
with reference to the figures of 1908-9
alone -

2) The Sub Inspector Saranas cannot
claim any credit for tracing

the property with B. K. & D. S. in
the jewelry in the Divans house.
The whole credit is due to the
Kalyan Police

3) If the Sub Inspector Saranas
can trace the property stolen
at the jewelry & bring the jewelry
to the Divans house & release
to work his exertions will be considered
satisfactory & brought to the notice of
Govt

Administration Reports.—

Annual Report of the Director of Public Instruction in the Bombay Presidency for the year 1909-10.

Educational Department,
No. 2280

Bombay Castle,
26th November 1910.

Letter from the Director of Public Instruction, No. 7863, dated 20th October 1910—
Forwarding copies of the Annual Report on public instruction in the Bombay Presidency for the year 1909-10.

RESOLUTION.—There was a marked expansion in all branches of educational work during the year. Taking all institutions together the number of persons under instruction rose from 793,000* to 850,000, an increase of 57,000. Of this figure public institutions which are under Government inspection contributed 54,000. The percentage of all pupils under instruction to the general population now stands at 3·3, the highest figure yet recorded. Expenditure shows a corresponding increase, the total from all sources during the year amounting to Rs. 1,23,52,000,* which is no less than Rs. 5,49,000 in advance of the figure of the previous year and more than one-half of the increase was devoted to primary education. The increase in expenditure from Provincial Funds alone was Rs. 2,33,000,* and the percentage on the total of expenditure from this source was 46·5 in British districts and 39·7 if Native State-territory be included.

2. Important proposals for the improvement of the University curricula were under discussion throughout the year, but very little progress had been made before its close. From the figures given by the Director of Public Instruction it appears that 74 per cent. of the expenditure on affiliated Arts, Colleges and 98 per cent. of that on Professional Colleges is defrayed by Government. These figures indicate the extent to which, apart from general policy, Government is interested in higher education in this Presidency.

3. Examination results do not vary greatly from those recorded in the previous year, the conspicuous features being the large proportion of failures at the Matriculation, the comparatively small number of aspirants for degrees in science and the greater measure of success attained by the latter in comparison with candidates for degrees in arts.

4. The number of lady students at the Elphinstone College has now reached a considerable figure, and the need for special arrangements to deal with them has been forcibly explained by the Principal, who writes as follows:—

“ Moreover the close association of male and female involved in a mixed education is so totally opposed to the traditions of the East as well as so fraught with possibilities of evil that in my opinion the system is rather a barrier than an encouragement to female education. That the number of girl undergraduates is increasing is a sign that even this is not sufficient to check the demand for a University education for women. If the conditions of that education were in accord with Oriental ideas of women's functions, the number would go up by leaps and bounds. I am confident that the time is ripe for the creation in Bombay of a women's college, managed by a staff of Oxford or Cambridge women graduates. The 30 students of this College added to nearly the same number at the Wilson College and those admitted to St. Xavier's, are sufficient to start with. If so radical a step is not possible at present, then I suggest the following half-measure. A special lecturer and tutor of female students should be appointed to the Elphinstone College. She should be a British graduate and a member of the Indian Educational Service. Her subject should preferably be English, because it is very easy to get women well qualified to teach that subject. She would take complete charge of the girls' studies in that subject, and would in addition supervise their general reading, their games, and, most important of all, their manners and conduct.”

* Figures to nearest 1,000.

5. There were 548 secondary institutions at work with 70,000 pupils, while the total expenditure was Rs. 26,37,000, all these figures showing a considerable advance over those recorded in the previous year.

Secondary Education.

6. The year was not marked by any open displays of insubordination or indiscipline on the part of the pupils, but it is regrettable that recent events should have shown that many pupils and ex-pupils of High Schools have in the past taken an active part in political agitation of the most debased kind. The Governor in Council is determined that scholars in Government and aided institutions shall abstain entirely from association in political movements of all kinds, and he trusts that in carrying out this policy he will have the full and active support of all classes. In this connection he views with satisfaction the endeavours made to interest parents and guardians in school life. Government propose to allot for each High School a sum sufficient to meet the expenses of a school meeting every year when parents and guardians will be invited to be present, and His Excellency in Council desires to invite their co-operation in furthering this movement by their presence on these occasions and by subscribing to poor boys' funds, games funds, prize funds, and the like.

7. The Department has important functions to perform in respect of secondary education, and His Excellency in Council has under active consideration measures designed to relieve the courses from the dominance of the Matriculation examination, to revise the curricula generally, to provide suitable text-books and to improve the prospects of the assistant masters. When these measures are in operation, some of the more patent defects of the existing system of secondary education will have been removed.

8. The effect of the special grant for the spread of primary education which amounted to Rs. 1,14,000 in the year under review, is clearly evident in the figures relating to primary education. The number of public institutions rose by 840 to 11,790 and of pupils by 50,000.* The total expenditure on primary education reached the total of Rs. 51,43,000,* of which Government contributed Rs. 18,96,000. The increase in the Government share was Rs. 2,91,000.* There has therefore been a wholesome extension of the facilities for elementary instruction, and in some parts of the Presidency there are indications that for the present further extension cannot be advantageously made, and that it may be more desirable to concentrate available funds on improving the prospects of the masters. The sums allotted for the latter object during the three years 1908-09, 1909-10 and 1910-11 have been Rs. 48,846, Rs. 2,42,000 and Rs. 2,86,251, and the Governor in Council will endeavour to provide the amount still required to give trained masters as nearly as possible a salary equivalent to the scale laid down in the Vernacular Masters' Code due regard being had to merit.

Primary Education.

9. Experiments have been made in several directions with the view of adjusting school hours and curricula to the real needs of the agriculturists. In the varied conditions prevailing in the Presidency alterations suitable in one locality may be found a failure in another. So far experiments have not met with any marked success, but the Governor in Council trusts that the efforts of the Department will not be relaxed, and that as the quality of the teaching staff gradually improves, it may be possible to allow greater latitude to local officers in devising and carrying out suitable experiments.

10. The Director of Public Instruction has discussed at considerable length the needs of the Muhammadans, and he shows that the Musulman community have no reason to complain that Government have not endeavoured to give full encouragement to them in promoting education. The figures demonstrate that the community is taking an increasing advantage of the facilities offered. At the same time the difficulties connected with the teaching of two vernaculars have not been completely solved, and it is a question whether it would not be for the educational advantage of the community frankly to discard Urdu in favour of the local vernacular as the compulsory language, leaving those who desired it, to add the accomplishment of a literary knowledge of Urdu.

Special Classes.

Attention continues to be paid to the educational needs of other special communities. The attendance of aboriginal and hill tribes has risen steadily, while the wants of the depressed classes have met with increasing consideration from municipalities and local boards.

11. There was a perceptible rise in the number of pupils attending special schools. The new Technical School at Ahmedabad for Special Instruction, which the public are indebted to the liberality of Sardar Sir Chinubhai Madhavlal, Kt., C.I.E., and his late father came into operation. Its course is closely connected with the great local cotton industry, and with its fine equipment and competent staff it promises to prove a highly successful institution.

12. The year has been marked by general activity in all educational matters; the University courses have been reviewed and are now in course of revision; many improvements have been carried out in secondary institutions and further measures are in contemplation; and the facilities for primary instruction have been widely extended and the prospects of the teaching staff have been improved, while a properly equipped and useful technical institute has come into operation. The Governor in Council desires to congratulate the Honourable Mr. Sharp and his colleagues on these results.

Administration Report of the Sávanur State for the year 1911-12.

No. 6635.

POLITICAL DEPARTMENT.

Bombay Castle, 3rd September 1912.

Memorandum from the Commissioner, S. D., No. Pol.—227, dated the 5th August 1912—
Forwarding a memorandum No. 4659, dated the 20th June 1912, from the Collector and
Political Agent, Dhárwár, who submits with his remarks the Administration Report of
the Sávanur State for the year 1911-12.

RESOLUTION.—The report has been suitably reviewed by the Political Agent
and calls for few remarks. In spite of the partial failure of the harvest the
suspensions and remissions of land revenue were not large and the balance for
collection was easily recovered. The total income of the State was much less
than in 1910-11 but if Abkari revenue be included, not much below the average
of the last five years. The Governor in Council is glad to learn that the State
after management for 20 years is now in a strong position financially and is
pleased to commend the Political Agent and the Administrator, Mr. Rajerao, for
this happy result. He looks forward with interest to the detailed report promised
by the Political Agent and pending its receipt refrains from further comment on
the administration report.

2. Copies of the report should be distributed as usual.

K. W. BARLEE,

Under Secretary to Government.
